

If you are looking for a cost-effective alternative to the traditional MDF pipe boxing then look no further, INSULBOX is a UPVC bespoke pipework boxing that is the answer for your project.

BENEFITS OF UPVC PIPE BOXING

- Low maintenance
- Choice of colours
- Lead-free environmentally friendly
- Will not warp, crack, discolour or blister
- Compatible with other building products
- High thermal insulation properties
- Tested fire resistance properties
- Resistant to normal levels of acid, alkalis, water and other pollutants
- Can be washed down and will not swell like timber products
- Does not require painting or decorating
- Ideal solution for schools, Hospitals, care homes, wash rooms and kitchen areas
- Standard sizes 100mm-600mm wide and anything above can be made to measure
- Personal protection for heat burns from vertical and horizontal pipework
- Prevents damage to pipework
- Can be permanently fixed or removable
- Access hatches can be installed for valve access
- Can be vented to allow ventilation for heat
- Cost effective against other boxing products

Does not require decorating like traditional MDF/timber

FREEFOAM AND THE ENVIRONMENT

Freefoam take social and environmental responsibilities seriously. Freefoam are certified within the Group to the ISO 14001:2004 Environmental Management System standard, which ensures that freefoam operations are in compliance with environmental legislation and target minimising use of resources on a continuous improvement basis. freefoam operate to the international standard ISO 14001, which forms an integral part of there methodology and helps to provide a safe and healthy environment for there employees and customers.

Freefoam products are made using an advanced environmentally friendly formulation, and do not contain lead. Nor do they contain CFCs or cadmium, both of which are also harmful to the environment. All freefoam products are REACH compliant. By choosing Freefoam, you and your customers are helping the environment.

The use of PVC-U, which is a thermo-plastic resin compound, means that freefoam products can be fully and successfully recycled. Similarly, our PVC-UE expanded foam can also be successfully recycled through granulation and controlled reintroduction into the manufacturing process
